

Commitment to Science-Based Targets (SBTi)

At Nobisco Ltd we recognise that climate change is one of the greatest challenges of our time. To ensure our business remains resilient and responsible, we are committed to aligning our operations with the latest climate science to limit global warming to 1.5°C above pre-industrial levels.

Our Policy Objectives

- **Scientific Alignment:** We commit to setting greenhouse gas (GHG) emissions reduction targets that meet the criteria of the Science Based Targets initiative (SBTi).
- **Net-Zero Ambition:** We aim to reach Net-Zero emissions across our entire value chain (Scopes 1, 2, and 3) no later than 2040.
- **Transparency:** We will publicly disclose our emissions inventory and progress towards our targets annually through our Sustainability Report and platforms like CDP.

Implementation Strategy

1. **Measurement:** Conduct regular, comprehensive carbon footprint assessments across all business activities.
2. **Decarbonisation:** Prioritize absolute emissions reductions through energy efficiency, renewable energy procurement, and supply chain engagement.
3. **Accountability:** Integrate climate targets into our corporate strategy and executive performance reviews to ensure long-term oversight.
4. **Collaboration:** Work closely with our suppliers, partners, and customers to drive innovation and reduce Scope 3 emissions.

Governance

This policy is overseen by our Board of Directors ensuring that climate action is embedded at the highest level of our decision-making. We believe that by following the science, we can build a more sustainable and prosperous future for our business, our stakeholders, and the planet.

Signed:

Andrew Morrison
